New York, Aug. 4.—Barring the activity and strength of the war stocks, BUSINESS PROSPECTS which is becoming a daily affair, the rise of Steel common to 705-8, the highest price since 1912, was the feature of today's stock market. Huge blocks of the stock changed hands Financiers Fear War's Outcomefrom 70 up, one block of 10,000 shares changing hands at 70.

Railroads and copper shares were less active than yesterday, but the war stocks continued in demand with There is not much that is encourag-

war stocks continued in demand with Bethlehem Steel advancing 22 points to the new high price of 250, where it closed.

Under leadership of Steel and the war shares the whole market displayed a strong tone with advances from 1 to 3 points in the most active issues. The market had a resting spell from midday until about the beginning of the last hour, when Steel began its steady upward roll that placed it at a new high for this movement just before the close. The undertone was strong at the close with indications of a continuance of the upward swing for tomorrow.

Car Stock Advances.

There is not much that is encouraging in the monthly bulletin of the Federal reserve bank for a revival of business. Generally the reports are gloomy. In some of the districts it is eyen suggested that money is tighter and business worse.

In the Boston district, for example, the reserve agents report that "while the situation, both business and financial, is in a healthy condition, there is a general hesitancy due to the unsettled conditions produced by the war in Europe."

The prevailing tightening of the money market in the Boston district is described in the following language: "Although money continues to accu-

vances.

Within the lest few days the failure of American Can to share with the other war stocks, the substantial advances being recorded, has caused many brokers to begin wondering whether distribution is going on in this issue. General reports in the Street have been that dividends on the common stock would be started at the rate of 4 per cent a year, following the payment of the \$3-4 per cent back dividends on the preferred. If dividends are started at 4 per cent, the book is now considered to have fully discounted such a distribution to share holders.

General supposition in the financial district is that only the wild-eyed speculators made large profits out of the sensational rise in the war stocks.

The most striking feature of the business situation in this district, says the report, "is the absence of encouraging reports on conditions in Philadelphia contrasted with the reported improvement in conditions throughout the rest of the district. In the Philadelphia vicinity business in the Philadelphia vicinity business in domestic lines is dull and below normal. A spirit of caution and hesi-

Forest Service Suggests Develop-

ment of Logged-Off Tracts. During the last decade the Forest Service has classified as agricultural and opened to public entry more than 15,500 individual scattered tracts of land in the national forests, comprising more than 1,700,000 acres, says an article by the Chief Forester, published in the Year-Book of the Department of Agriculture. just issued. Within the last two years, in addition, several large blocks have been eliminated aggregating more than 2,500,660 acres, while nearly 2,600,600 acres more are now under consideration for elimination. All the remaining agricultural land in the national forests is con-fined chiefly in isolated tracts scattered here and there; to restricted areas requiring irrigation, where water cannot be obtained; and to certain river bottoms and benches which are not covered with very heavy and valuable timber.
A constant pressure is being brought

to bear on the government by private in-dividuals who want to acquire possession of these heavily timbered agricultural lands, single quarter-sections of which often have a value as high as \$20,000 for the timber alone. In spite of the fact
